Many thanks for your help when you have a chance.

LF Attendees:

Ibrahim Haddad

Erin Thacker

Guests:

Myung Joo Ham

Voting members present (quorum was reached):

Jerry Tan (4Paradigm), Jun Zhang (Baidu), Michael Rooke (Nokia), Nancy Rausch (SAS), Wei Meng (ZTE), Beat Buesser (ART), Alexandre Eichenberger (ONNX), Andreas Fehlner (ONNX), Jim Spohrer (ONNX)

Note on Quorum

To ensure quorum, the TAC is implementing a new attendance rule (Effective Dec 1, 2022). Voting members who miss 2 consecutive TAC meetings will not be allowed to vote and must attend 2 consecutive meetings before their voting privileges are reinstated. Please see the [TAC Wiki](#) for more information about voting.

We now have 16 voting members on the TAC. 8 are needed for quorum.

TAC representatives: - Please ensure you attend the bi-weekly calls or email Erin/Ibrahim to designate an alternate representative when you cannot make it. We need to ensure quorum on the calls especially when we have items to vote on.

Call to Order

Nancy Rausch (NR) called the meeting to order at 6:01 PST and Erin Thacker (ET) took minutes.

NR reviewed the antitrust policy notice.

Agenda

NR reviewed the agenda for the meeting. There were no further changes or additional topics added.

Roll Call (2 min)

Approval of Minutes (2 min)

NNStreamer Annual Review (20 min)

Outreach Committee Update (10 min)

Open Discussion

Approval of Minutes

NR discussed the minutes from the February 9th, 2023 TAC meeting.

Proposed Resolution:

That the minutes of the February 9th meeting of the Technical Advisory Council of the LF AI & Data Foundation are hereby approved.

Alexandre Eichenberger moved that the minutes be approved, Jerry Tan seconded.

APPROVED - By vote of the TAC, the minutes of the February 9th, 2023 meeting of the Technical Advisory Council were approved.

Annual Review of NNStreamer:

Myung Joo Ham (MH) went over NNStreamer. Areas covered included organization that are contributing, project contributions, key achievements in 2022, and areas in which the project could use help. MH also provided feedback on working with LFAI & Data.

- Discussion:
 - NR asked if people are finding the project by themselves and are they coming to you for collaboration? MH responded that the uptick in project adoption was due to conference attendance and that they are coming to the project for collaboration due to attendance at these events in 2022.
- Ruth Akintunde (RA) asked about what MLOps problems the project is facing right now. MH responded that the biggest challenge is not having consistent models for testing and two-way data sharing between devices and servers.
- NR asked if there was a registry of devices and MH responded that there is not a formal registry, but they are keeping track of each device/collaborator.
- Michael Rooke (MR) pointed out that: models with PyTorch & TensorFlow could be good for collaboration.

Outreach Committee Updates:

Jerry Tan (JT) presented results from a survey conducted by him on behalf of the Outreach Committee. There were six questions in the survey and six people participated. The analysis provided the following:

- Lack of information led to low participation
- Participants want more offline-events
- KubeCon is their ideal reference

JT then went over the Outreach Committee plan for 2023, which included:

- Focus on 2 main events --- AI Con (with independent branding)
 - Outside of China the first half year
 - In China, the second half year
- Participate in other Cons such as GotoC, KubeCon, etc.
- More offline meetups (half-day or one-day)

Discussion: NR asked how the survey went out. JT responded that it went out via the Outreach committee mailing list and another popular mailing list amongst China members. NR suggested adding the survey to TAC general list and the LFAI & Data Slack channel for more survey results.
